

xalps **GTO**

*ARE YOU ready
TO TOUCH the clouds?*

lightness sacrificing nothing

xalps **GTO**

X-ALPS GTO (Gran Turismo Omologato) follows in the footsteps of the harness designed specifically for the X-Alps paragliding competition. Its principal characteristics are light weight, safety and comfort, giving the pilot unparalleled flying pleasure. At the same time, pilots can rest assured that they are flying with a product that is wholly certified in accordance with the LTF procedure..

- ▶ The geometry of its structure and its active flying characteristics make it ideal for a wide range of pilots.
- ▶ We have succeeded in keeping this harness very light, without compromising its strength, by using technical materials such as Polyamide, Lycra, and a seat in carbon.
- ▶ In addition, the X-Alps GTO harness is fitted with the innovative **anti-forget DRC system**, which means that the pilot cannot close the front of the harness without having gripped the chest-strap fastening point.

With its X-Alps GTO harness, the Woody Valley Team are certain that they are providing a product superbly finished right down to the smallest details, complete with LTF certification. The harness will accompany you in many great and **SAFE** flights!!

light-weight competition,
harness **sacrificing**
nothing

Woody Valley X-Alps GTO // details

- 1 12 cm foam protection;
- 2 Emergency parachute container, built in under the seat;
- 3 Close-fitting carbon seat for a better pilot fit and optimum comfort;
- 4 Shoulder-strap and chest-strap adjustment can be performed in flight;
- 5 Self-inflating rear section for better aerodynamics;

DRC

dual ring connection

Photo 1

The front of the harness cannot be fastened without using the DRC system (Dual ring connection).

Photo 2 - 3

By gripping the DRC system, the pilot is reminded of the chest-strap, which greatly reduces the possibility of forgetting to fasten the chest- and leg-straps (Get-Up System).

brand-new!

// details of X-Alps **GTO**

// Leg cover, adjustable in length
with a range of 12 cm

// Harness with
fine adjustment
systems, so that
you get the best
performance right
from the first flight

// Lightweight speed bar with three flexible steps
